

## Vision Area 6: Healthcare Access

### Objective 37: Increase the proportion of adolescents who have an annual wellness checkup

Many health and social problems peak in adolescence (homicide, suicide, motor vehicle crashes, substance use and abuse, smoking, sexually transmitted infections, HIV, unplanned pregnancies, and homelessness). Receiving annual wellness checkups can help detect and prevent the development of these problems in adolescence and later in life.

#### Statistics and Goals

Measure: Percentage of adolescents who received a wellness checkup in the last year

Source: National Health Interview Survey and the Maryland Health Care Commission

National Baseline	Maryland Baseline	Healthy People 2020 Target	Maryland 2014 Target
68.7%	46.0%	75.6%	60.8%
